1.Introduction:

D.K.Government College(A), Nellore strongly believes that academics and research are two eyes of higher education. Our college will always be one step ahead to kindle zeal in research in both faculty and students.

The first argument emphasizes on the necessity of research oriented teaching. Educators engaged in research are updated with latest information and updated facts instead of all that is mentioned in a book years old. It is essential that teachers engage in research to come out with latest and original information but also when they expect students to be research oriented they must have familiarity with various aspects to the concept. Thus teaching is improved if staff engages in research i.e research based teaching.

Students when involved in research based learning are bound to learn more and better than they would without the integration of research. Students start as consumers of knowledge and move toward knowledge producers.

NELLORE.

3. Research policy:

Rapid growth in scientific knowledge is an indication of quest for discovery and has an impact on economic and societal development. Science, technology and innovation are often initiated at the college research environment and they are also the mission of Higher Education. Research is the foundation of knowledge that brings new energy, builds state of the art facilities, promotes research publications, develops collaborations and becomes part of active community that shares the mission objectives. Taking these into considerations, following D.K. Government college for women(A) Research Policy is implemented. We pledge to follow,

- Organizing conferences at national level
- Conducting regular training in research methodology for UG/PG students and faculty
- Lectures and experts in the country are invited to participate in workshops and seminars.
- Digital library system to provide global access to the knowledge
- Access to virtual classes to interact with subject experts.
- Constitution of research committee in the college to guide and facilitate research in various fields and control unethical trends in research.

NELLORE.

5. Code of Ethics to check malpractices and plagiarism in Research

Code of ethics and conduct—

Teaching and research are noble professions based on high moral values. Ethics and honesty are the two important components of teaching and research. Plagiarism, publishing or presenting others work as their own will affect healthy academic atmosphere in the institute and the society. It may distress the reputation of the individual and the institute.

Prohibited Conduct:

Faculty/Students enrolled in academic/research programme are subjected to this conduct.

1. cheating, fabrication, facilitating dishonesty and plagiarism are subject to violation of code of ethics and conduct.
2. violation of code of ethics and conduct include submission of an item in academic/research work that has previously been submitted without fair citation of original work or authorization by the faculty member supervising the work.
3. violation leads to disciplinary actions and restriction from academic/research programme for a particular period.
4. The committee will submit a report and recommend the disciplinary action to be imposed like fine or warning.
