Date: 25.03.2022

LIQUID DETERGENT

Objective

To prepare liquid based detergent - a cleansing agent that differs from soap but can also emulsify oils and hold dirt in suspension. The function of liquid detergent is break up stains and suspend the dirt in the water to prevent the redeposit ion of the dirt onto the surface. Surfactants disperse dirt that normally does not dissolve in water.

Procedure

Under the supervision of Sri. Gurucharan Das, Rtd lecturer in Chemistry, DKW, Smt. D. Surendra, HOD, department of chemistry, the teachers as well as the students of the Department prepared the Anionic based liquid Detergent.

Ingredients

- 500 mL of sodium lauryl ether sulfate (SLES) as a base ingredient of liquid detergent
- 500 mL of alpha olephinic sulphonate (AOS) an additive in making soap lather
- 150 mL, of Sodium Silicate (SS), serves as a cleansing power of the detergent
- 5%-1% or 5-10 grams table salt or Sodium Hydroxide to maintain basic PH

- 500 mL of demineralised water
 - 2-5 mL of fragrance
 - 5-10 gms of urea to increase viscosity
1. Mix sodium lauryl ether sulfate and alpha olefinic Sulphonate in 1:1 ratio (each 500mL) and stir well with stirrer.
 2. Add 150 mL of Sodium Silicate to the above mixture and stir well.
 3. Continue mixing until it become sticky. Add small amount of water while mixing to avoid creating bubbles. Set aside the SLES-AOS-SS mixture when it turned cream.
 4. Get your cream and mixed it again slowly using the electric mixer.
 5. In a separate mixing bowl, dissolve 2 tablespoonful of salt or urea or lye in water before adding it to mixture SLES-AOS-SS.
 6. Add 2-5mL of blue to the mixture.
 7. Continue mixing using the electric mixer until it become creamy.
 8. Put it in a container and add few drops of fragrance and mix it well and set aside.
 9. From time to time, scoop bubbles forming at the top of the mixture and finally add 500mL-1000mL of demineralised water with stirring.
 10. When there is no bubbles anymore, put the liquid detergent in a clean bottle. You can use the liquid detergent after 24 hours

Summay

The students have prepared the anionic liquid detergent with the help of Sri. Gurucharan Das and faculty members of chemistry department. The detergent sample bottles were distributed among the college community.

The College Principal Dr. D. Giri, has rendered full support for the successful execution of this extension activity.

Feedback form

List of Students Attended

S.No.	Name	Class	Signature	Feedback
1	K. Poojitha	III rd BSc(BZ)	K. Poojitha	Good
2	V. Suseela	III rd BSc(M)	V. Suseela	Good
3	K. Mahima	III rd BSc(BZ)	K. Mahima	Good
4	K. Rajeswari	III BSc(BZ)	K. Rajeswari	Good
5	U. Sivakumar	III BSc(MP)	U. Sivakumar	Very well
6	Y. Sindhuja	III BSc(MP)	Y. Sindhuja	very well
7	P. Sravanthi	III BSc(MP)	P. Sravanthi	very well
8	Gr. Bhavana	III BSc(MP)	Gr. Bhavana	Good
9	Md. Arfa Firdose	III BSc(MP)	Md. Arfa Firdose	Very Good.
10	L. Sivanya	III BSc(MP)	L. Sivanya	very Good
11	M. vijaya lakshmi	III BSc(BZ)	M. vijaya lakshmi	Good
12	K. Venkata lakshmi	III BSc(MP)	K. Venkata lakshmi	very good.
13	K. Sandhya Rani	III BSc(MP)	K. Sandhya Rani	Excellent.
14	T. Archana	III BSc(MP)	T. Archana	Good.
15	P. Sireesha.	III BSc(MP)	P. Sireesha.	very Good.

Preparation of Liquid detergent

83

20/3/22

All the Staff members of Chemistry department have assembled ^{on 20/03/2022} in the Department room and discussed the following agenda.

Agenda :- To organize a programme on "The preparation and action of High Quality Liquid detergent for top load-front load washing machines" ^{by Dr. V. Gurucharan Das} as part of best practice in the Department of Chemistry on 23/03/2022 at 11:00 AM.

Discussion :- Teaching Staff & Non teaching staff of the Department thoroughly discussed and eventually decided to organize a programme on the "Preparation and action of High Quality Liquid detergent for top up load-front load washing machines" ^{by Dr. V. Gurucharan Das} as part of the best practice in the Department of Chemistry on 24/03/2022 at 11 AM. Our Staff members strongly believe that this programme inspire the students and to develop the enterpenure skills in them.

Resolution (1) It is resolved to organize a programme on "The preparation and action of High Quality Liquid detergent for top load-front load washing machine" by Dr. V. Gurucharan Das in the Department of Chemistry ~~by Dr. V. Gurucharan Das~~ on 23/03/2022 at 11:00 AM.
